

XM-B Mobile Jammer System

XM-B is the world most advanced Jamming technology system used for Protecting military and VIP convoys from the threat of Remotely Controlled Improvised Explosive Devices (RCIEDs).

Specification

Frequency Range

Total RF Power

Jammer Module Number

Channel Number

Cooling System

System Protection

Jamming Source

Remote Control

Antenna Type

Description

Customised between 20 - 6000 MHz

20000 Watt

12 , 18 or 24 Bands

30 Bands, Max: 70 Bands

Systematic Smart Cooling System

VSWR, Over-voltage, Over-Current

Direct Digital Synthesize Technology

Full System Operation Control

Omni directional Antennas with a roof remotely-controlled-foldable antennae platform system.

Number of Antennas

Vehicle Platform
